PROFESSIONAL SUMMARY

Software developer with hands-on experience building full-stack web applications using Python, Django and JavaScript, backed by a background in IT support and technical operations. Comfortable in Linux environments and Git-based collaborative workflows with practical interest in network security.

TECHNICAL SKILLS

Languages: Python, JavaScript, Go, HTML, CSS, SQL

Frameworks & Libraries: Django, REST APIs

Tools & Platforms: Git, GitHub, Linux (Debian), Windows

Areas of Interest: Network Security, Backend Development, Web Application Development

PROJECTS

Merry Chama - Merry-go Round Management Platform (Python, Django, SQLite)

github.com/Opango14/merry_chama - merrychama.onrender.com

- Built a full-stack Django web app for managing community merry-go-round groups, including user registration/login, group creation, contribution, payout tracking and a group admin dashboard.
- Implemented session-based authentication, role-restricted group administration and an Excel export feature for transaction records; configured environment-based settings for local and deployed use.

KilimoClick - Crop and Irrigation Advisory Engine (Python, FastAPI, REST API)

github.com/HACKWITHNESBITT/KilimoClick

- Built the FastAPI backend for a crop-suitability and irrigation-timing advisory tool for smallholder farmers.
- Implemented soil-moisture and planting-safety decision logic, GIS raster data retrieval and a forecast-caching layer integrated with the KijaniSpace agro-climate API.

English-Swahili Translator - Full-Stack Take-Home (Python, Django, JavaScript) github.com/Opango14/Full-Stack-Take-Home

- Developed a bilingual translation web app with a Django REST endpoint and a vanilla JavaScript frontend that sends live translation requests and renders results without a page reload.

WORK EXPERIENCE

Apprentice, Software Engineering - Zone01 Kisumu (Feb 2026 - Present)

- Participating in an intensive peer-to-peer software engineering program, building hands-on projects in Go, JavaScript and Python.
- Applying algorithmic thinking, data structures and Git version control while collaborating with peers on real-world applications, debugging and code reviews.

IT & Operations Manager - Anigraphics Copiers and IT Solution, Eldoret (Jun 2025 - Jan 2026)

- Provided IT support and troubleshooting for customers, including hardware setup, minor repairs and basic networking alongside operating digital printing and scanning equipment.
- Managed daily sales, customer interactions and record-keeping while maintaining efficient, reliable service delivery.

ICT Assistant - Koitaleel Samoei University College - ICT Department (May 2024 - Aug 2024)

- Delivered technical support and training to staff and students, resolving connectivity issues and managing LAN/Wi-Fi access across the institution.
- Performed routine hardware diagnostics, software updates, and maintenance to keep systems running reliably.

EDUCATION

BSc, Computer Science - University of Eldoret
